

# 2010 New Lab Start-Up Program Checklist

## TO HELP YOU GET STARTED

This checklist is designed to help you determine your laboratory needs. It is organized into five primary groups:

- Equipment and Instruments
- Bioreagents and Chemicals
- Supplies
- Apparatus, Clothing, and Furniture
- Services

Each group contains a listing of product categories with the names of the major Fisher Scientific suppliers and brands for each category. We've added a check box to help you track your selections.

## NEED MORE INFORMATION?

For a more detailed products list, visit [www.fishersci.com/newlab](http://www.fishersci.com/newlab) and click on the checklist link in the left-hand column. You will find an electronic file that you can download. It contains suggested products in each category, with catalog numbers, a brief description, and links to the product page on [www.fishersci.com](http://www.fishersci.com). Using this file, you can create your own lab shopping list.

## A LAB STOCKED THE WAY YOU WANT IT

Our goal is to equip your lab to your exact specifications. Your Fisher Scientific Sales Representative can assist you in selecting the best combination of products to meet your preferences and budget. We carry a far greater product selection than we have included on the checklist. Additional sizes, models, and brands can be found in the Fisher Scientific catalog or online at [www.fishersci.com](http://www.fishersci.com).
