On your first visit to fishersci.com, you'll see that the site's portal page offers a gateway to our family of four distinct e-stores:

- **Fisher Scientific**—Your single source for the latest equipment and instrumentation, the finest chemicals, and the highest-quality supplies for scientific research, laboratory safety, and testing.
- **Fisher Safety**—A comprehensive portfolio of leading-edge safety products for industrial, scientific, healthcare and first responder customers.
- **Fisher HealthCare**—Serving the nation's diagnostic testing needs in hospitals, reference labs and physicians' office laboratories.
- **Fisher Science Education**—Resources for educators to create scientific excitement in elementary, secondary and college classrooms.

Once you choose an e-store, fishersci.com remembers your selection and automatically returns you there in future sessions —enabling you to focus on the products that are specific to your work.

# ENHANCEMENTS IN SEARCH

The screenshot displays the Fisher Scientific website interface. At the top, there is a navigation bar with the Fisher Scientific logo and links for 'Scientific Home', 'Help', 'Browse by: Products - Suppliers - Application', 'Literature & Catalogs', 'MSDS', and 'Fisher Scientific International'. A user login section includes fields for 'Username:' and 'Password:', a 'LOG IN' button, and links for 'New User?' and 'Forgot Password?'. Below the navigation bar, a search bar is visible with a dropdown menu showing search results across different stores: 'in the Scientific store', 'in the HealthCare store', 'in the Science Education store', and 'in the Safety store'. The main content area features a 'Choose Your View:' section with options for 'Standard', 'Life Science', and 'Research & Analytical'. A featured article titled '2005/06 Fisher College Science Education Catalog' is highlighted. The page is organized into three columns: 'Highlights' with a technical webinar announcement, 'Product Resources' with a list of offers and programs, and 'Support' with links to literature, newsletters, and online assistance. A shopping cart icon at the bottom left shows 'No items in cart'.

## To Save You Time, Your Favorite Category Becomes Your Default Search Screen.

- Use the Menu on the left to Search products within the active store, within another store, or across all stores.
- Produces search results more relevant to the your area of interest.

Even more than products, fishersci.com offers you information that is important to you—simply choose a "view" near the top of the page to explore specialty-specific promotions, featured products, events, news articles and more.

The screenshot displays the Fisher Safety website interface. At the top, there is a navigation bar with the Fisher Safety logo and links for Shopping Cart, Rapid Order, Username, Password, and LOGIN. Below this is a secondary navigation bar with links for Safety Home, Help, and Browse by: Products - Suppliers - Application. The main content area features a search bar, a dropdown menu for "in the Safety store", and a "GO" button. The page title is "Protecting What Matters Most". The main text discusses the challenges of testing the safety of food and water, working in confined spaces, and enhancing hospital surge capabilities. It mentions Fisher Safety's products and services for protecting workplaces and oneself. A security warning is visible on the left side of the page, stating: "For security reasons you will be automatically logged out after 15 minutes of inactivity." The bottom of the page is divided into three columns: Highlights, Product Resources, and Support. The Highlights column includes links for Site Updates, Featured Products, and Industry News. The Product Resources column lists First Responder and Healthcare, with descriptions of their respective services. The Support column lists links for Clearance Sale Items, Contact Us, Customer Support, Order Literature and Catalogs, Fisher Safety Links, and an online assistance center.

## FIND WHAT YOU NEED IN NO TIME

fishersci.com is your one-stop source for science, healthcare, safety and science education, where a few clicks put all the products and suppliers that are relevant to your work right at your fingertips. The site offers two primary tools to find the products that you need: **Browsing** and **Searching**.

### **Browse by: Products - Suppliers - Application |**

The three **Browse by** links at the top of every page allow you to choose exactly how you prefer to shop:

- **Browse by Products** offers product categories both general and specific, relevant to the e-store that you've chosen.
- **Browse by Suppliers** provides information and product lists for the quality suppliers that you know and trust.
- **Browse by Application** focuses your ability to find products based on the specific discipline on which your work is focused.

Click in the **Search** box to find products by keyword, type, brand or manufacturer. The search results that are returned will be specific to the e-store you've chosen—or, by choosing the Search pulldown menu, you can expand your search to other e-stores, or to **All products**.

What's more, you can further refine your search by using these valuable tools:

- **Advanced Options** allows you to enter more criteria for a more targeted result. No matter what search feature or criteria you use, you can narrow the results to product categories, suppliers or applications.
- **Chemical Search** helps you locate chemicals by catalog number, name, CAS number, molecular or linear formula, structure or substructure.
- **Substructure Search** enables you to quickly find chemical compounds and Acros Organics products that meet your needs. Click, drag and drop a substructure; view properties such as formula weight, boiling point, melting point, refractive index and density; and view chemicals as 3-D models that you can manipulate.
- Once you've located a desired chemical, get **Material Safety Data Sheets** by clicking the MSDS icon on that chemical's product page.
- Find **Certificates of Analysis** for Fisher chemicals by catalog number and/or lot number.

Once fishersci.com returns your search results, you can choose to refine those results even further by selecting a specific **Category**, **Supplier**, **Application** or by entering additional keywords.
